Dear Professor Yu,

We are delighted to accept your manuscript entitled "Transfer learning enables identification of multiple types of RNA modifications using nanopore direct RNA sequencing" for publication in Nature Communications. Thank you for choosing to publish your interesting work with us.

**Licence to Publish and Article-processing Charge**

- In approximately 7-10 business days you will receive an email with a link to choose the grant of rights necessary for publishing your paper and – if applicable – to provide payment information for your article-processing charge (APC), either via credit card or by requesting an invoice.

If needed, our Author Services team will be in touch regarding any additional information that may be required.

**In order to avoid any delays, please ensure that you have emails from Springer Nature whitelisted in your mail system. Please note that production will not continue until the Licence to Publish and Article-Processing Charge steps are completed and your proof corrections are submitted.**

If you have any questions about our Open Access requirements, or our legal forms, costs, please contact ORsupport@springernature.com.

- In recognition of the time and expertise our reviewers provide to Nature Communications's editorial process, as of November, 2018, we formally acknowledge their contribution to the external peer review of articles published in the journal. All peer-reviewed content will carry an anonymous statement of peer reviewer acknowledgement, and for those reviewers who give their consent, we will publish their names alongside the published article. For more information, please refer to our FAQ page:

<https://www.nature.com/documents/ncomms-reviewer-information.pdf>

We will edit your manuscript to ensure that it conforms with our house style and send you a link to an online eProof for checking in a separate email to the publishing

agreements. Please read your proof with great care to ensure that the sense has not been altered. We also suggest you discuss the proof with your co-authors, but please ensure that only one author communicates with us and that only one set of corrections is returned via the online correction in the eProof. The corresponding (or nominated) author is responsible on behalf of all co-authors for the accuracy of all content, including spelling of names and current affiliations.

To ensure prompt publication, we request that proofs are returned within two working days. If there is any period within the next four weeks in which you won't be available, please nominate a co-author with whom we can correspond, and let us know their email address as soon as possible.

Please note that your Supplementary Information files may have been edited for style and are now finalized. They will be uploaded directly to the Nature Communications website in preparation for publication of the Article. Any requests to make changes will only be considered in exceptional circumstances and will result in a delay to publication.

Acceptance of your manuscript is conditional on all authors' agreement with our publication policies (see [www.nature.com/nature/authors/policy/index.html](http://www.nature.com/nature/authors/policy/index.html)). In particular, your manuscript must not be published elsewhere and there must be no announcement of the work in the media until the publication date.

At this stage, you may wish to make your institution's press office aware of the forthcoming publication, if you wish to bring your work to the media's attention, so that they can start preparing any publicity. Please note that the paper is still under embargo until it is published in the journal. Further details of our embargo policy can be found here <http://www.nature.com/authors/policies/embargo.html>.

Publication is typically within two to three weeks of acceptance. Please note there will be no further correspondence about your publication date. When your article is published, you will receive a notification email. **If you are planning an embargoed press release or require a specific publication date, please complete our [scheduling requests form](#), or contact [NatureCommunicationsProduction@springernature.com](mailto:NatureCommunicationsProduction@springernature.com), as soon as possible after acceptance and we will endeavour to accommodate your request.** For further information on the journey of your article from acceptance to publication, please see our [Author FAQs](#).

Your Article will be open for online commenting on the Nature Communications website. You may use the report facility if you see any comments which you consider inappropriate, and of course, you can contribute to discussions yourself. If you wish to track comments on your Article, please register for this service by visiting the 'Comments' section in the full text (HTML) version of your paper.

If you have not already done so, we would welcome the submission of material for the 'Featured Image' section on the Nature Communications home page. Images should relate to the content of your manuscript, but need not be contained within the paper. Suggestions should be sent by email to [naturecommunications@nature.com](mailto:naturecommunications@nature.com). Please provide 1200x675-pixel RGB images. Unfortunately, we cannot promise that your suggestions will be used.

A form to order reprints of your Article is available at <http://www.nature.com/reprints/author-reprints.html#options>

If you have any questions about open-access invoicing or payment, please contact [authororders@nature.com](mailto:authororders@nature.com)

You can now use a single sign-on for all your accounts, view the status of all your manuscript submissions and reviews, access usage statistics for your published articles and download a record of your refereeing activity for the Nature journals.

We look forward to publishing your paper.

Best regards,

Qian Cheng PhD
